

## 4 ABSTRACT OF THE DISCLOSURE

5 An extruder drive has a housing, at least two extrusion  
6 worms each having a drive shaft extending into the housing, and  
7 at least one drive motor including at least one cylindrical  
8 stator fixed in the housing and a cylindrical rotor cooperating  
9 with the stator so as to be rotatably driven by the stator. The  
10 rotor surrounds the drive shafts, and each of the drive shafts is  
11 independently connected to the rotor for driving thereby.
